

YUG DAVE

Full-Stack AI Engineer

Dortmund, Germany | +49 15560963422 | daveyug2002@gmail.com

[Linkedin](#) | [Github](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack AI Engineer pursuing an M.Sc. in Digital Transformation in Germany, building AI-native platforms end-to-end - from LLM orchestration and semantic matching to production deployment. Hands-on experience across Next.js, Spring Boot, and Domain-Driven Design, paired with enterprise operations exposure in a live logistics environment.

SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript, SQL, C++, HTML5, CSS3

Frameworks & Libraries: Spring Boot 3, Next.js 14, React.js, Vue 3, Node.js, Express.js, FastAPI, Flask, Tailwind CSS, Bootstrap

AI & Machine Learning: LLM Orchestration, Prompt Engineering, RAG, Speech-to-Text Processing, Generative AI Integration, NLP, Scikit-learn

Data & Infrastructure: PostgreSQL, Supabase, MySQL, MongoDB, MSSQL Server, Docker, Nginx, CI/CD (GitHub Actions), Git, Linux, WebSockets

APIs & Architecture: GraphQL, RESTful APIs, Microservices, Domain-Driven Design (DDD), MVC, Agile/Scrum

Languages (Spoken): English (C1), German (A2), Hindi (Native)

PROJECTS

HireVault — AI-Native Career Acceleration Platform | [Live Demo](#)

Mar 2026 – Present

Next.js 14, TypeScript, FastAPI, WebSockets, Supabase (PostgreSQL), LLM Orchestration, Speech-to-Text

- Architected a full-stack recruitment platform, deployed on Vercel, that semantically scores candidates on intent and skill depth rather than basic keyword matching, addressing common ATS keyword-filtering limitations.
- Built a live WebSocket speech-to-text interview simulator and an ATS optimization studio, also empowering managers with a dashboard to dynamically re-rank resumes by AI-generated intent scores, drastically reducing time-to-hire.
- Implemented Supabase Row Level Security for per-user data isolation and split the Next.js App Router into server/client components to improve load performance.

HeroSync — Gamified Habit-Tracking Platform | [Live Demo](#)

Oct 2025 – Present

Spring Boot 3, Java 21, Vue 3, GraphQL, REST, Docker, Nginx, MySQL, Oracle Cloud Infrastructure (OCI), Generative AI

- Designed an AI companion that ingests live user state (XP, streaks) into real-time prompts and responds through selectable personas, replacing static progress tracking with a reactive narrative layer.
- Built a modular hybrid GraphQL/REST API on Spring Boot with a containerized Docker architecture supporting concurrent user progress and transactional data integrity.
- Deployed production backend infrastructure on an Oracle Cloud instance utilizing an Nginx reverse proxy for secure, low-latency traffic routing.

Automated Vehicle Calculation Dictionary

Dec 2023 – Apr 2024

L&T Technology Services | React.js, Bootstrap, Python (Flask), Node.js, REST APIs

- Designed and built an internal engineering web tool used by L&T engineers to securely access and execute specialized calculations required in automated vehicle development.
- Engineered a robust data exchange pipeline using Axios to connect the React.js/Bootstrap frontend with the Python/Node.js REST API layer, delivering the solution through Agile sprints in Git and Jira.

WORK EXPERIENCE

Operations & Process Analyst (Part-time)

Jun 2025 – Present

Sanacorp Pharmahandel GmbH · Düsseldorf, Germany

- Support physical inventory flow and order fulfillment processing at a major German pharmaceutical distribution center, working within enterprise inventory management systems.
- Investigate operational bottlenecks and stock discrepancies to maintain data consistency across high-availability logistics workflows under strict compliance requirements.

Software Engineer Intern

Dec 2023 – Apr 2024

L&T Technology Services · Vadodara, India

- Built an internal Automated Vehicle Calculation Dictionary (React.js frontend, Python/Flask + Node.js REST API) to replace manual spreadsheet-based calculations used by automated-vehicle development teams.
- Delivered a working web tool, handed off to the engineering team at the end of the internship, that let engineers run specialized AV calculations directly instead of via manual spreadsheets - reducing reliance on error-prone manual entry.
- Delivered the tool through Agile sprints using Git and Jira, working alongside the vehicle development engineering team.

Full-Stack Developer Intern (Two Terms)

May 2022, May 2023 – Jun 2023

Prakash Software Solutions Pvt. Ltd. · Vadodara, India

- Built a full-stack Online Library Management System (ASP.NET MVC, MSSQL) with role-based access control, centralizing book issuing and inventory tracking for university staff and students.
- Built a full-stack Online Bus Reservation Portal with dynamic JavaScript/AJAX seat selection, secure reservation handling, and backend PDF receipt generation.

EDUCATION

M.Sc. Digital Transformation

Sep 2024 – Present

Fachhochschule Dortmund · Dortmund, Germany

- Core modules: Innovation Driven Software Engineering, Software Architectures, Digital Systems, R&D Project Management, Usability Engineering, Software-intensive Solutions, and an individual Unity VR application for the Pico Neo 3 Pro.

B.Eng. Computer Engineering

Jun 2020 – Jun 2024

Charusat University - Gujarat, India | GPA: 9.38 / 10 (Distinction)
